

Hendrick Nkuba

London, ON · hendrick.nkuba@outlook.com · hendricknkuba.com · github.com/hendricknkuba

Full-Stack Developer with hands-on experience building and maintaining web applications, designing RESTful APIs, and managing structured content systems. Strong foundation in PHP, SQL, and modern JavaScript, with a product-oriented mindset focused on reliability, usability, and performance. Currently pursuing a Web Development diploma at Fanshawe College, eager to contribute to a collaborative team.

SKILLS & OTHER

Languages: JavaScript, TypeScript, PHP, SQL.

Frameworks & Libraries: Laravel, Wordpress, Angular, Vue.js, React, Nextjs, React Native, TailwindCSS, Nodejs, CMS-based workflows

Concepts: REST APIs, OOP, MVC, SDLC, Debugging, Unit Testing, CI/CD Pipelines, Agile, Responsive Design, Web Accessibility (WCAG basics)

Environment & Tools: Linux, VS Code, Firebase, Supabase, Github, Jira, Bitbucket, Postman, Azure, VPS, Codex, Claude, Postgresql, MySQL.

Soft Skills: Cross-functional collaboration, Problem solving, Clear communication, Continuous learning

PROFESSIONAL EXPERIENCE

ISPTEC, Luanda, Angola 2023 - 2024

Full-Stack Developer

- Developed and maintained internal web applications using Laravel and Vue.js.
- Designed and implemented RESTful APIs supporting front-end features and business workflows.
- Optimized SQL queries and data processing, reducing load times by approximately 25%.
- Collaborated in an agile team environment, participating in planning, debugging, and code reviews.

OpenMind, Luanda, Angola 2024

Frontend Developer

- Developed interactive web interfaces with React.js, improving user experience and engagement.
- Translated Figma designs into functional and responsive code with high accuracy across various devices.
- Contributed to code reviews and quality assurance, helping to maintain clean and efficient code.
- Collaborated with backend designers and developers to align technical execution with product objectives.

Uhaul, London, ON, Canada 2025 - Present

Customer Service

- Use internal logistics and management systems to handle rentals, inventory, and operational data.
- Collaborate closely with team members to maintain smooth daily operations.

PERSONAL PROJECTS

[FalconFind](#) — Campus Lost & Found Platform

Angular · Node.js · Express · Firebase · Tailwind CSS

- Built a full-stack web platform to manage lost and found items within a campus environment.
- Collaborated with a team of 3 developers, contributing to both frontend and backend integration.
- Led integration between frontend and backend systems, ensuring consistent data flow and API communication.
- Participated in Agile workflows, including task planning, pull request reviews, and team coordination.
- Contributed to technical documentation, including system structure, API contracts, and setup guides.
- Designed responsive and accessible UI to ensure usability across devices.

KairosFlow — Queue & Appointment Management System

Laravel · Vue.js · Tailwind CSS · Supabase

- Designed and implemented an MVP web application to manage digital queues and appointment scheduling.
- Built RESTful API handling services, time windows, roles, and secure check-in flows.
- Developed responsive UI with emphasis on clarity and operational efficiency.
- Modeled relational database optimized for scalability and structured data management.
- Applied clean architecture principles to support maintainability and future expansion.

[EscalaMaster](#) — Scheduling & Assignment Management Tool

Next.js · TailwindCSS · Firebase

- Built a scheduling system to generate and manage rotating assignments based on business rules.
- Implemented automated scheduling logic with constraints such as availability and role distribution.
- Integrated Firebase for persistence with fallback strategies to improve reliability.
- Designed an intuitive UI for managing structured data and schedules.

EDUCATION

Web Development and Internet Application

Fanshawe College

London, Ontario, Canada

2025 - 2026
